- Optional Modbus RS485 communication interface.
- The end user can adjust CO2/Temp. range which

- correspond with the analog outputs Via Modbus, also can preset the direct proportion or inverse proportion for different applications.
- With LCD or without LCD selectable
- LCD display real-time measurements of CO2, temperature and relative humidity.
- Simple and smart design and installation of sensor probe with a water-proof and porous film
- Extendable probe meets more air duct systems
- 24VAC/VDC power supply.
- EU standard and CE-approval.

Detection Focus

✓ **Carbon Dioxide (CO_2)**

Indoor CO_2 level is a universal accepted parameter for the condition of indoor ventilation and air quality.

A time period can be preset from 1 to 24 hours, e.g. 5 hours, then the monitor can display CO_2 average level during this period, which provides an objective and true data for the measurement of the air quality in a certain space.

- Non-dispersive infrared (NDIR) CO_2 sensor with more than 10-year lifetime
- ABC self-calibration technology guarantees reliable CO_2 measurement
- CO_2 range: 0~2000ppm/0~5000ppm optional
- Rapid response, high stability and consistency

✓ **Temperature and humidity**

Combined digital temperature and humidity sensor with high accuracy and stability. It also has compensation to CO_2 and air quality which makes the measurements more accurate by minimizing environmental effects.

Typical Applications

◆ Building management for office areas and residental

◆ Ventilation control system
