Overview

KNX Panel Power Interface EU/US (with External Power Supply) (See Figure 1-2) has 2 power interfaces. The KNX bus power interface is a standard KNX communication interface; the auxiliary power interface is connected to an external power supply to provide an auxiliary power input for the matching panel. Its main features include:

- Provides working and communication power for matching panels
- Provides auxiliary power supply for matching panels

Components and Operation

Dimensions - See Figure 3 - 8

- 1. Communication interface: Connects to panel
- 2. Screw hole: For fixing KNX Panel Power Interface (with External Power Supply) in wall box with screws.
- 3. Metal plate
- 4. Interface of 20-30V DC auxiliary power input
- 5. KNX connector

Installation

Installation - See Figure 9 (Take KNX Panel Power Interface EU (with External Power Supply) as an example)

Step 1. Install the wall box in the wall.

Step 2. Fix the KNX Panel Power Interface EU (with External Power Supply) onto the wall box with screws. Step 3. Hold the edge of the panel, and insert the panel in the slots of KNX Panel Power Interface EU(with External Power Supply) vertically.

Note(s)

- The panel should be installed in the wall box.
- Bus cable KNX/EIB standard cable
- The power interface should work in conjunction with panel.

Safety Precautions

- The installation and commissioning of the device must be carried out by HDL or the organization des-ignated by HDL. For planning and construction of electric installations, the relevant guidelines, regulations and standards of the respective country are to be considered.
- The device should be wall box mounted. HDL does not take responsibility for all the consequences caused by installation and wire connection that are not in accordance with this document.
- Please do not privately disassemble the device or change components, otherwise it may cause mechanical failure, electric shock, fire or body injury.
- Please resort to our customer service department or designated agencies for maintenance service. The warranty is not applicable for the product fault caused by private disassembly.

Technical Data

Basic Parameters

Dasic Parameters			
Working voltage	21~30V DC		
Auxiliary power supply	20~30V DC		
Communication	KNX		
Cable diameter of KNX terminal	0.6-0.8mm		
External Environment			
Working temperature	-5°C~45°C		
Working relative humidity	≤90%		
Storage temperature	-20°C~60°C		
Storage relative humidity	≤93%		
Specifications			
Dimensions	EU: 80×80×28.5(mm) US: 110.5×80×28.5(mm)		
Net weight	EU: 78g, US: 87g		
Housing material	Flame-retardant nylon, metal		
Installation	Wall box (See Figure 9)		
Protection rating (Compliant with EN 60529)	IP20		

Name and Content of Hazardous Substances in Products

	Hazardous substances					
Components	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Chromium VI (Cr (VI))	Poly-brominated biphenyls (PBB)	Poly-brominated diphenyl ethers (PBDE)
Plastic	0	ο	ο	ο	0	ο
Hardware	0	ο	ο	ο	-	-
Screw	0	0	0	×	-	-
Solder	×	0	0	ο	-	-
PCB	×	0	0	ο	0	0
IC	0	0	0	0	×	×

The symbol "-" indicates that the hazardous substance is not contained.

The symbol "o" indicates that the content of the hazardous substances in all the homogeneous materials of the component is below the limit requirement specified in the Standard IEC62321-2015.

The symbol "x" indicates that the content of the hazardous substance in at least one of the homogeneous materials of the part exceeds the limit requirement specified in the Standard IEC62321-2015.
